

SkinScript

PRODUCT

**10% TCA (Trichloroacetic Acid)
With 15% Azelaic, 5% Arbutin, 2% Kojic
pH 1.0**

FUNCTIONS

TCA is great for re-texturizing the skin with a peel that is regulated the number of layers applied. Azelaic acid is great for darker-skinned patients, who have melasma or whose acne spots leave persistent brown spots. The combination of these acids is a beautiful peeling treatment for evening skin tone, reducing acne and retexturing the skin.

RECOMMENDED FOR

Skin with hyperpigmentation, melasma, and/or acne. Can be used on Fitzpatrick 4-6 when properly prepped with pre-treatments.

BENEFITS

- Exfoliating and softening
- Reduces acne
- Even Skin Tone

ACTIVE INGREDIENT PROFILE

Trichloroacetic Acid is a great acid for peeling the skin making room for regrowth of new skin. Improves wrinkling, roughness, and softens skin.

Azelaic Acid is great for minimizing acne and lightening the skin.

Alpha-Arbutin is a non-irritating skin lightener that will correct uneven skin tone. It is a natural alternative to hydroquinone.

Kojic Acid lightens skin discolorations, slows melanin production by inhibiting tyrosinase.

HOW TO USE

Professional Use Only. After cleansing and degreasing the skin, apply one layer at a time with gauze, allowing for 3-5 minutes between layers. Apply 2 layers and leave on the skin for 8 hours.

SIDE NOTES

Avoid contact with eyes. Flush completely if contact occurs.
Always use sun block after use of this product.
